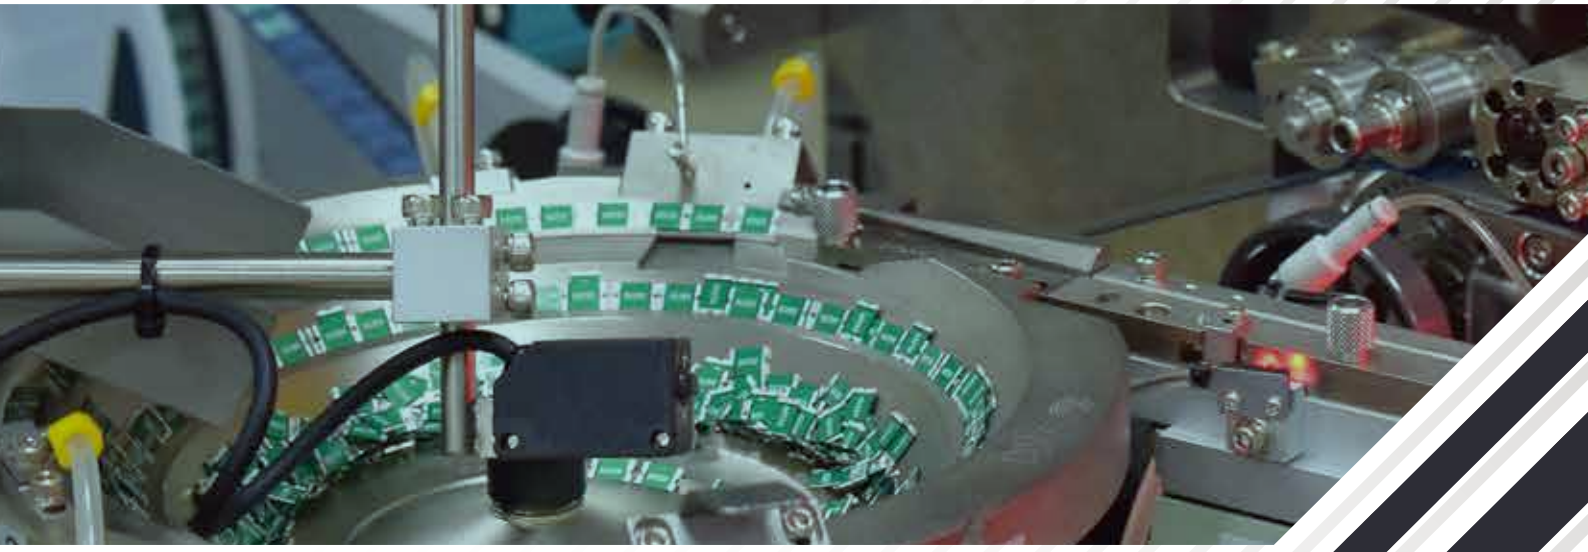
FUZETEC Circuit Protection Solutions for Today & Tomorrow's Industries

Contents

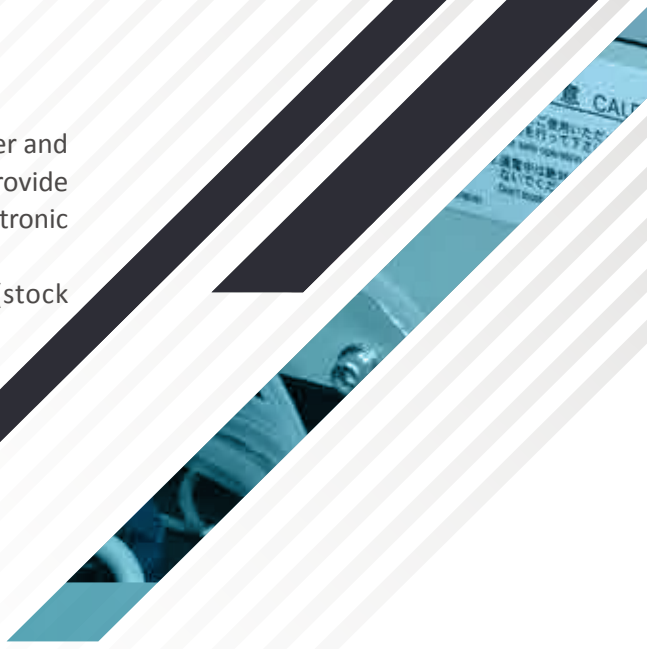
FUZETEC

Committed to provide continuous circuit protection solutions
to today's and tomorrow's electronic and electrical industries.



Fuzetec Technology

Founded in 1999, as a world leading PPTC resettable fuse manufacturer and designer, Fuzetec Technology Co., Ltd. (FUZETEC™) is committed to provide continuous circuit protection solutions to today's and tomorrow's electronic and electrical industries.
Fuzetec is a public company in Taiwan, Taipei Exchange Market (stock code: 6642)



Products & Application

With the most advanced Positive Temperature Coefficient (PTC) conductive polymer technologies, FUZETEC™ offers a wide variety of Polymeric PTC resettable fuses to fulfill the needs of modern demanding high-tech applications. They include, but are not limited to: Automotives, Smart Application & IoT, Industrial Control , Energy Solutions etc.

NOTE : AII Specifications subject to change without notice.

Safety, Quality and Customer Satisfaction

With third party approvals (UL, C-UL and TÜV), FUZETEC™ products are ensured to provide long lasting safety and performance. From product design and development, through manufacturing and quality control to delivery and shipment, Fuzetec Technology strictly implements IATF16949, ISO9001 and ISO14001 quality standards to assure its products' quality and consistency. Besides, as our long term involvement in the Auto industry, all FUZETEC™ automotive PPTC products are set to be tested and qualified using the AEC-Q200 specification for electronic components used in Auto industry. With continuous improvement, we are committed to provide top products and services to better satisfy our customers' needs. We strongly believe that excellent partnership between customers and us are the best and the only route to achieve success in tomorrow's competing business world.

Fuzetec Patents & Formula

FUZETEC™ holds 57 self-developed PTC patents (US x 24, TW x 21, CN x 12) and continue applies multiple patents each year. These expertises of polymeric PTC material and product engineering, grants us the flexibility and advantage on new product development. With our own patented PPTC formula, we can custom the product electrical characteristics to meet customer specific requirements and design PPTC device structure for special application. Fuzetec's technical know-how and engineering expertise altogether, is your solution provider for circuit protection.

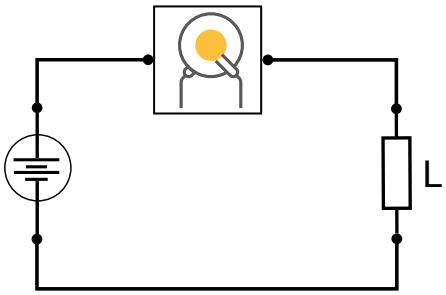
NOTE : All Specifications subject to change without notice.

How Does the Resettable Fuse Work

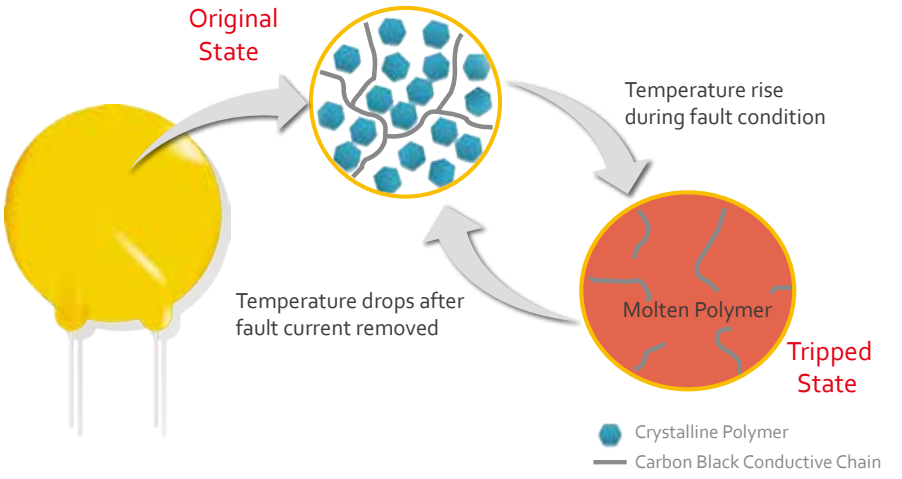
FUZETEC™ resettable fuses are designed and made of patented novel polymeric PTC material in thin chip form, developed solely by FUZETEC™. With electrodes and leads attached on both sides, it is placed in series to protect a circuit. At "normal operating condition" the device remains at an extremely low resistance (milli-ohms) and allows the electrical current to flow through it without any restriction. When overcurrent conditions occur, the polymeric PTC material heats up and its resistance increases sharply. Such a sharp resistance increase (to an insulated status) cuts off the current in the circuit, and consequently protects the element and device in the circuit. Upon fault current being removed, the resettable fuse cools down and its resistance drops to the original extremely low value. The resettable fuse is "reset" and allows the current flow through the circuit again.

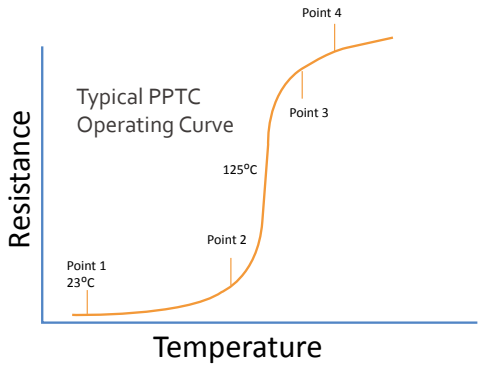
PPTC in Circuit

The typical PPTC application is to be used as a series component in a circuit.



How It Works

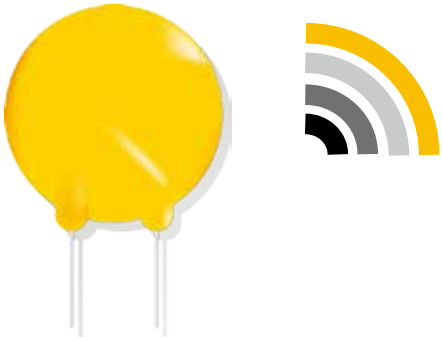




Basic Structure

Epoxy Coating Solder Layer

Nickel Plated Copper Foil PTC Element



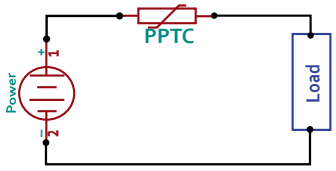
FUZETEC

the PPTC Selection Guide

SELECTION GUIDE

1 Circuit Parameters

Determine your circuit parameters



- Circuit Operating Current
- Maximum Operating Voltage
- Maximum Interrupt Current
- Maximum Ambient Operating Temperature

2 Voltage & Current Rating

Select a Fuzetec PPTC Device with proper electrical characteristics

V_{Max}/I_{Max} are the maximum voltage/current PPTC devices can withstand without damage
Hold Current (I_H) is the maximum current which a PPTC device will keep in low resistance state at 23°C
Trip Current (I_T) is the minimum current which a PPTC will trip at 23°C
Check the electrical characteristics table to ensure the PPTC device can match the circuit parameters

3 Ambient Temperature

Evaluate the maximum circuit operating ambient temperature

PPTC device is temperature sensitive, check the Thermal Derating table to verify the performance of PPTC device you select in Step 2 under different ambient temperature

4 Time to Trip

Determine Time to Trip for desired protection capabilities

Time to Trip is the amount of time that a PPTC device need to transfer low resistance state to high resistance "Tripped" state under fault condition. Make sure the PPTC device to provide the desired protection capabilities

5 Check Dimension

Fuzetec provide a various types of packages and different dimensions, use the dimension table to compare the PPTC device you selected and your application's design consideration.

Glossary of Terms

I_H	:	Hold Current - Maximum current at which the device will not trip at 23°C still air.
I_T	:	Trip Current - Minimum current at which the device will always trip at 23°C still air.
V_{Max}	:	Maximum voltage device can withstand without damage at its rated current.
I_{Max}	:	Maximum fault current device can withstand without damage at rated voltage (V_{MAX}).
Pd	:	Maximum power dissipated from device when in tripped state in 23°C still air environment.
R_{MIN}	:	Minimum device resistance at 23°C.
R_{Max}	:	Maximum device resistance at 23°C.
$R1_{Max}$	:	1) Maximum resistance of device at 23°C measured 1 hour, after tripping for all product series; 2) or after REFLOW soldering of 260°C for 20 seconds for all SMD series; 3) or after WAVE soldering of 260°C for less than 5 seconds for all DIP series. Special Note : -In the event that TWO of the above three conditions were experienced once each, the acceptance criteria will become 1.3 times of $R1_{Max}$. - In the event that ALL of the above three conditions were experienced once each, the acceptance criteria will become 1.5 times of $R1_{Max}$.

Automotive

Fuzetec has been partner of major automotive industry companies and OEMs for more than 10 years. We provide surface-mount, radial leaded and custom shaped chip/disc type PPTC resettable fuses for vehicle electronic equipment overcurrent circuit protections.

Automotive devices that operate under rigid environment need robust and reliable circuit protections, therefore our automotive product lineup are set to satisfy AEC-Q200 standard for electronic components used in the automotive industry.

Automotive PPTC Resettable Fuse Application

DC Motor Protection
Fuzetec Radial Leaded & Custom Shaped PPTC are ideal for DC motors employed in power operated automotive applications

Infotainment & ADAS System
As the vehicle system evolved to more intelligent and more complex application, Fuzetec offers a wide range of PPTC devices for application from In-Car multimedia to Advanced Driver Assistance System

48V Vehicle System
Fuzetec PPTC devices has developed test plan following AEC-Q200 guidelines to test for suitability and reliability for automotive industry's Latest voltage system & applications.

Feature

IATF-16949 & AEC-Q200 Auto Industry Standard
Applicable Resettable overcurrent circuit protection
RoHS Compliant, Lead-Free and Halogen-Free(HF)
Resistance range binned and sorted available
Customized products Available

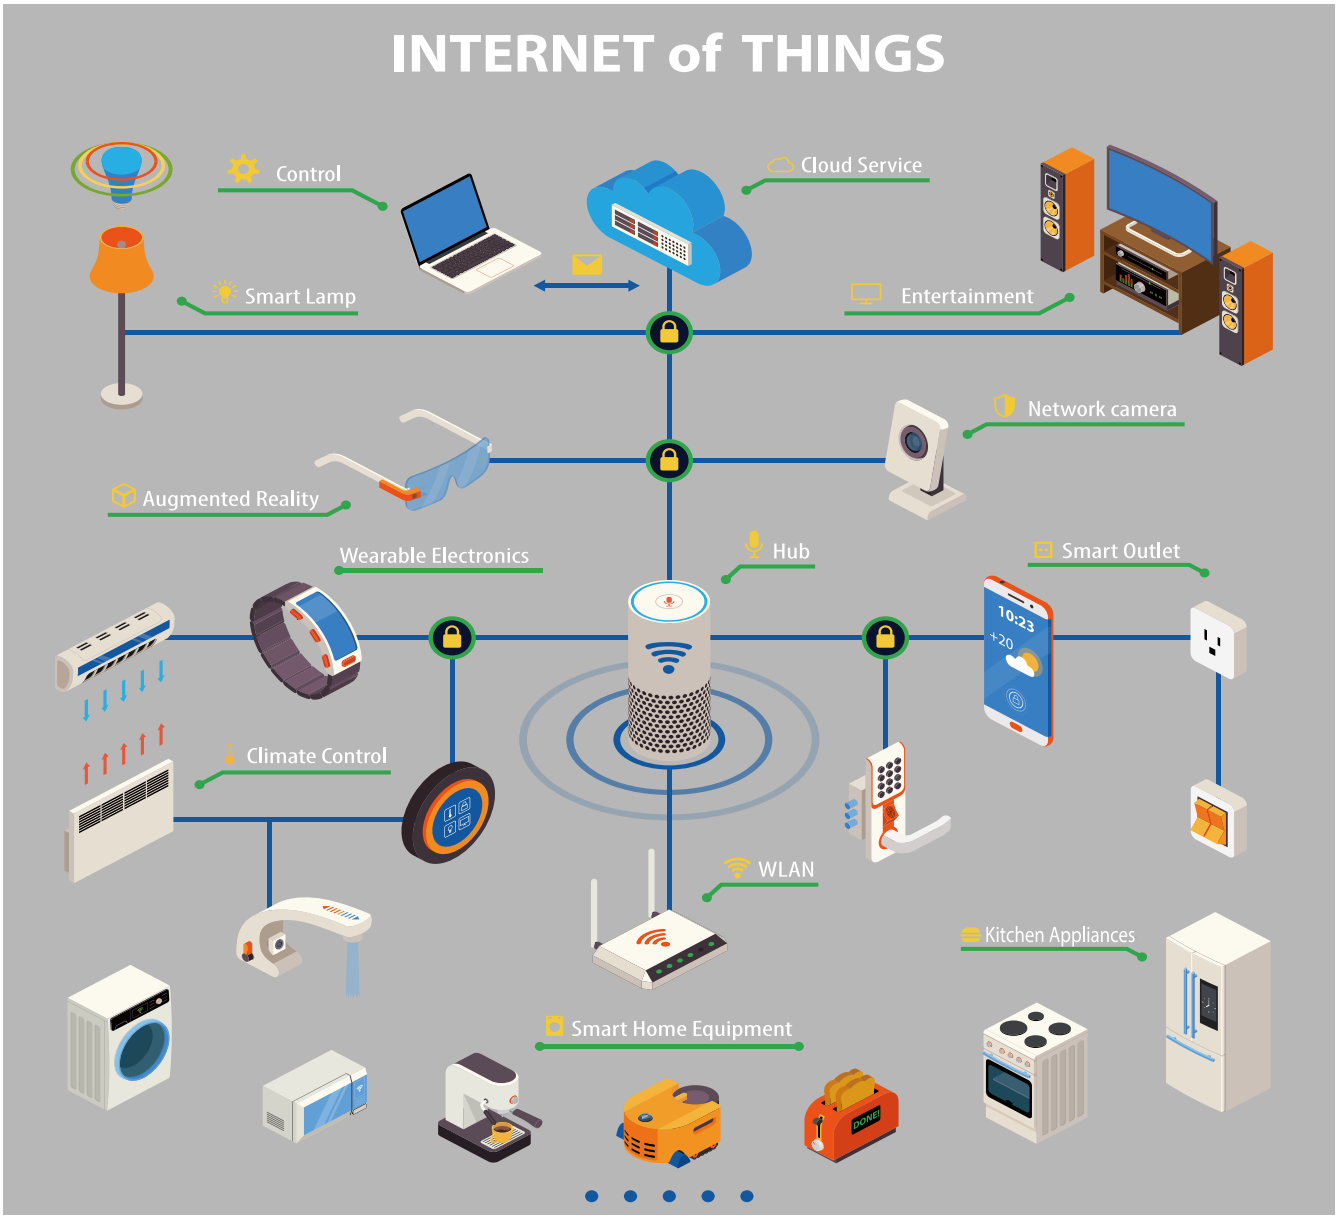
Application

DC Motor & Motor Circuit Protection
Sensors & Actuator
Car Infotainment System, ADAS and Telematic System
Automotive Body Electronics
48V Power System, BMS & Automotive Backup Batteries

Smart Application & IoT

From Network Infrastructure to IoT node & gateway; from Telecommunication Network to personal wearable devices. Fuzetec provides, a full range of overcurrent circuit protection solutions with its compact size, flexible design and cost competitive Polymeric Positive Temperature Coefficient (PPTC) resettable fuses.

For more than 10 years, Fuzetec has been providing test proven products to assist telecom equipment to meet test requirements of power cross and power induction surge defined by ITU-T, UL and Telecordia GR-1089 safety standards.



Feature:

Function-oriented design (High hold current/Fast trip time/High Ambient Temp/High Rated Voltage Current)
RoHS Compliant, Lead-Free and Halogen-Free(HF)
Resistance range binned and sorted available UL60950, UL497A, ITU-T K20/K21 & GR-1089 Compliant

Application:

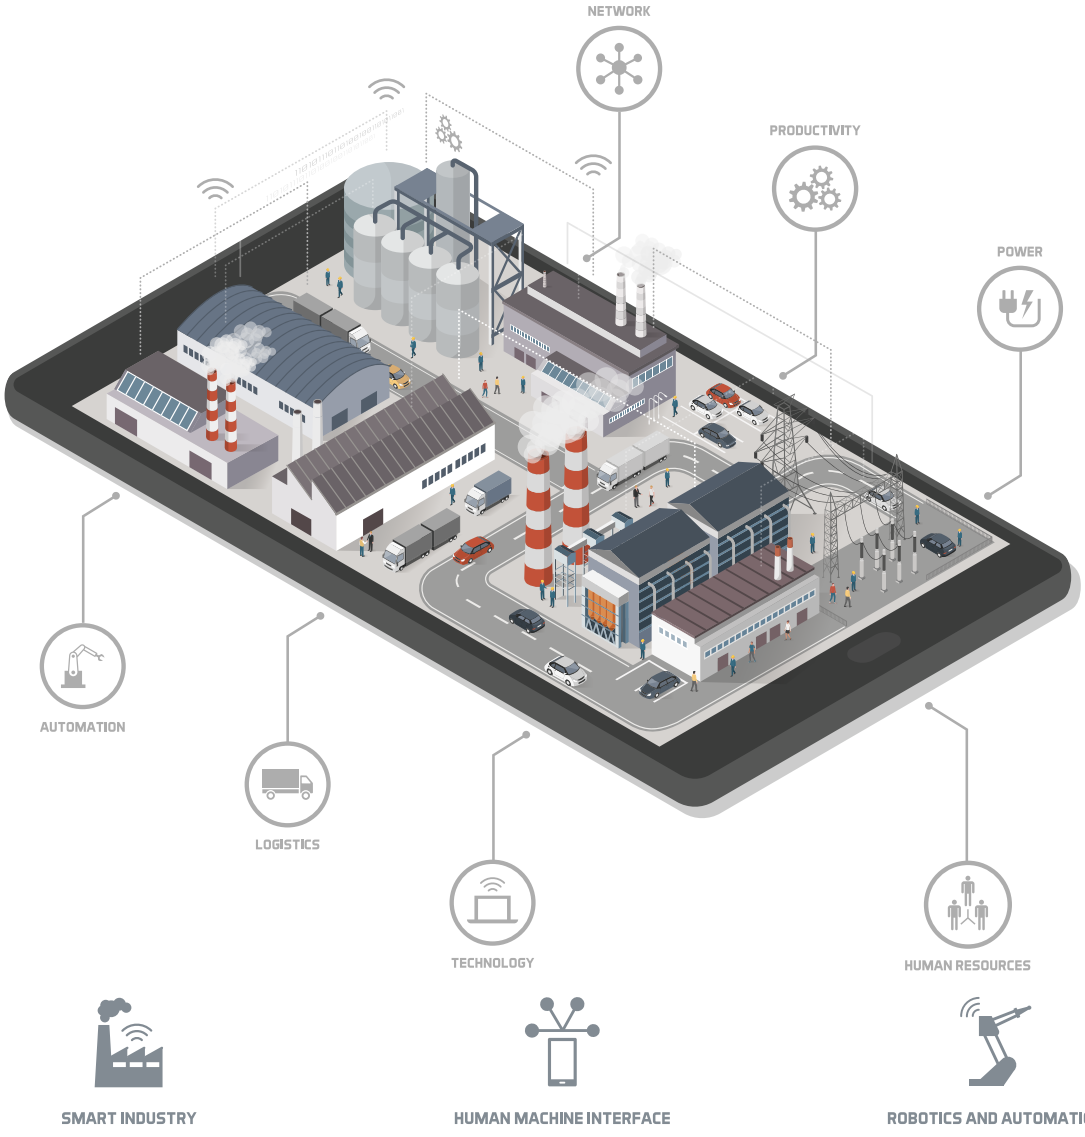
Wearable & Smart Home Devices
IoT Node & Gateway Devices
Gaming & Entertainment
Data Center & Network Solution
Line Voltage Protection

Industry 4.0

Indusrty 4.0 is the current industrial transformation with automation, data exchanges, cloud, cyber-physical system, Big Data, and autonomous industrial techniques.

Fuzetec specializes in providing circuit protection with high reliability to Industrial, Transportation, and Medical markets under harsh and critical environment.

With the emerging trends of automation, electrification and digitalization of industrial technology, such as facility monitoring system, digital power supply, intergrated security system and internet connectivity. Fuzetec solution meets industrial standard and offers reliable circuit protection for these industrial applications against electrical faults for 24/7 industrial operation.



Feature

Resettable overcurrent circuit protection
RoHS Compliant, Lead-Free and Halogen-Free(HF)
Resistance range binned and sorted available
Function-oriented design (High hold current/Fast trip time/High Ambient Temp/High Rated Voltage Current)

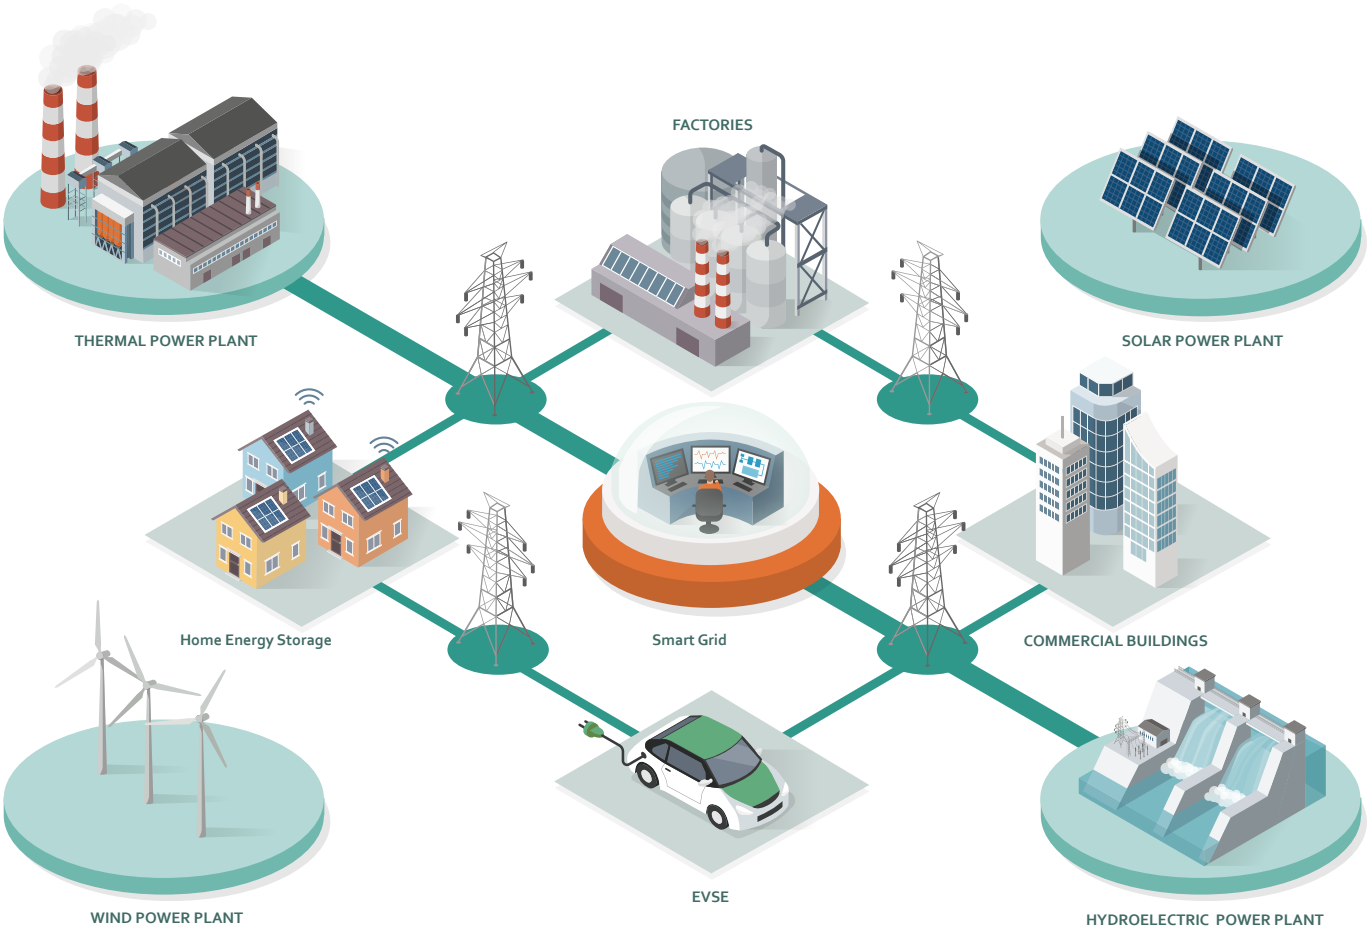
Application

Automation & Control System, Industrial Machinery, Power Supply, Security Surveillance, Semiconductor Equipment, Fleet Control System Medical Equipment

Energy

The global renewable energy market is driven by government support. Improving battery technologies and reducing of initial cost has boosted the demand of battery energy storage systems. Integrate renewable sources with energy storage system can provide solution to on/off grid flexibility to reduce peak demand charges.

Fuzetec, a reliable partner for major Li-ion battery manufacturer in Asia, Europe and America, has developed a comprehensive line of circuit protection solutions for potential overcurrent and overheating condition. Fuzetec SMD, Low Rho SMD/Strap and custom PPTC disc devices offer flexibility for battery application with different performance characteristics.



Feature:

Ultra Low Resistance for Better Battery Life
Resettable overcurrent circuit protection
RoHS Compliant, Lead-Free and Halogen-Free(HF)
Resistance range binned and sorted available

Application:

Lithium Ion Battery Cell and Packs
Battery PCM
Smart Grid
Solar Energy DC/AC Inverter

FRX Series

Application
Wide variety of electronic equipment
Product Features
Low hold current, Solid state Radial-leaded product ideal for up to 60V_{DC}

Operation Current
0.05A ~ 3.75A
Maximum Voltage
60V_{DC}

Temperature Range
-40°C to 85°C

FRX250-60F~FRX375-60F	:	100 Pcs/Bag, 1.0K Reel/Tape

Physical specifications

Lead material	FRX005-60F~FRX040-60F Tin plated copper clad steel, 24 AWG.
	FRX050-60F~FRX090-60F Tin plated copper, 24 AWG.
	FRX110-60F~FRX375-60F Tin plated copper, 20 AWG.
Soldering characteristics	MIL-STD-202, Method 208E.
Insulating coating	Flame retardant epoxy, meets UL-94V-0 requirement.

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

NOTE : All Specifications subject to change without notice.

FRX110-90F	:	300Pcs/Bag, 1.5K Reel/Tape
FRX135-90F~FRX185-90F	:	200Pcs/Bag, 1.5K Reel/Tape
FRX250-90F~FRX375-90F	:	100Pcs/Bag, 1.0K Reel/Tape

Physical specifications

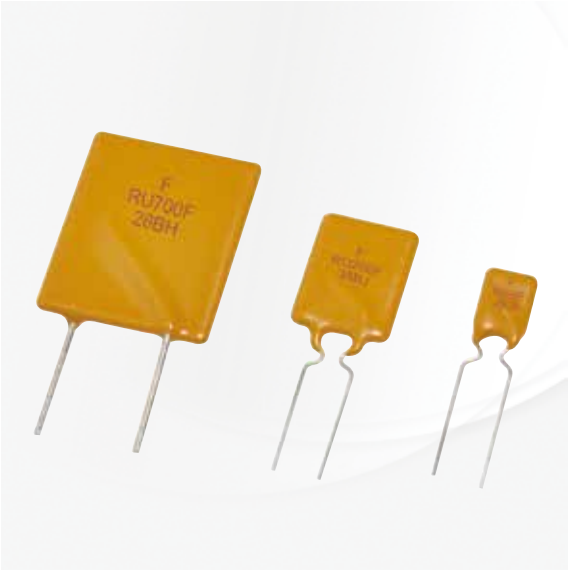
Lead material	FRX010-90F~FRX040-90F Tin plated copper clad steel, 24 AWG.
	FRX050-90F~FRX090-90F Tin plated copper, 24 AWG.
	FRX110-90F~FRX375-90F Tin plated copper, 20 AWG.
Soldering characteristics	MIL-STD-202, Method 208E.
Insulating coating	Flame retardant epoxy, meets UL-94V-0 requirement.

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

NOTE : All Specifications subject to change without notice.

FRU Series



Application
Wide variety of electronic equipment
Product Features
Low resistance, High hold current, Solid state
Radial-leaded product ideal for up to 30V_{DC}

Operation Current
0.90A~9.00A
Maximum Voltage
30V_{DC}

Temperature Range
-40°C to 85°C

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

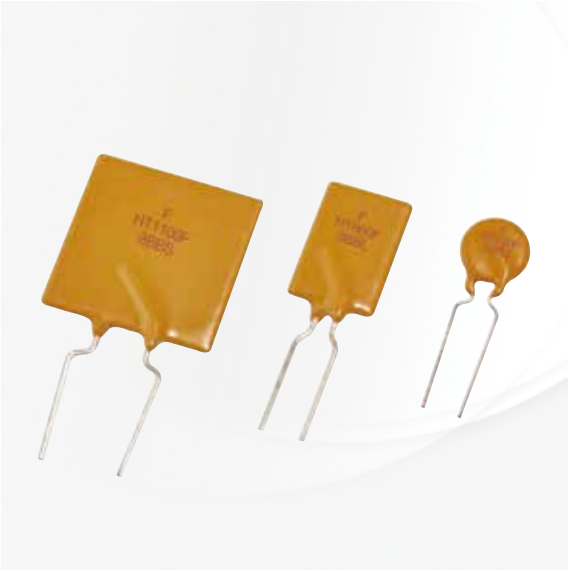
FHT Series



Application
Wide variety of electronic equipment
Product Features
Very Low resistance, Very High hold current, Solid state, Radial leaded product ideal for up to 16V/30V_{DC} and operating temperatures up to 125°C.

Operation Current
0.50A~15.00A
Maximum Voltage
16V/30V_{DC}

Temperature Range
-40°C to 125°C

Physical specifications

Lead material	Tin plated copper, 22 AWG.
Soldering characteristics	MIL-STD-202, Method 208E.
Insulating coating	Flame retardant epoxy, meets UL-94V-0 requirement.
*NOTE : All FRHV products are designed to assist equipment to pass ITU K20/K21 UL60950 or GR1089 specification.	
*FRH150-600MF, FRH160-600VF meet UL497A Overvoltage and Endurance Conditioning requirements for Thermistor type component.	

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

NOTE : All Specifications subject to change without notice.

Package Information

Part Number		Standard Package
FRV005-240F~FRV016-240F	:	500 Pcs/Bag, 2.0K Reel/Tape
FRV025-240F	:	300 Pcs/Bag, 2.0K Reel/Tape
FRV033-240F~FRV040-240F	:	200 Pcs/Bag, 2.0K Reel/Tape
FRV055-240F	:	200 Pcs/Bag, 1.0K Reel/Tape
FRV075-240F	:	200 Pcs/Bag, 2.0K Reel/Tape
FRV100-240F~FRV200-240F	:	100 Pcs/Bag

Physical specifications

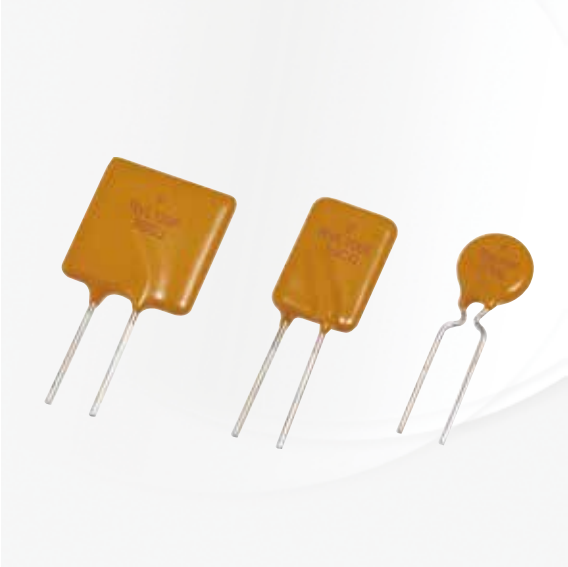
Lead material	FRV005-240F~FRV016-240F Tin plated copper clad steel, 24AWG.
	FRV025-240F~FRV040-240F Tin plated copper, 22AWG.
	FRV055-240F~FRV200-240F Tin plated copper, 20AWG.
Soldering characteristics	MIL-STD-202, Method 208E.
Insulating coating	Flame retardant epoxy, meets UL-94V-0 requirement.

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

NOTE : All Specifications subject to change without notice.

FRVL Series



Application
Line Voltage Power Supply, Transformer and Appliances Product

Features
Solid state, Radial leaded product ideal for up to120$V_{AC/DC}$

Maximum Operation Current
0.10A~3.75A

Maximum Voltage
120$V_{AC/DC}$

Maximum Interrupt Voltage
135$V_{AC/DC}$

Temperature Range
-40°C to 85°C

- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

FUZETEC

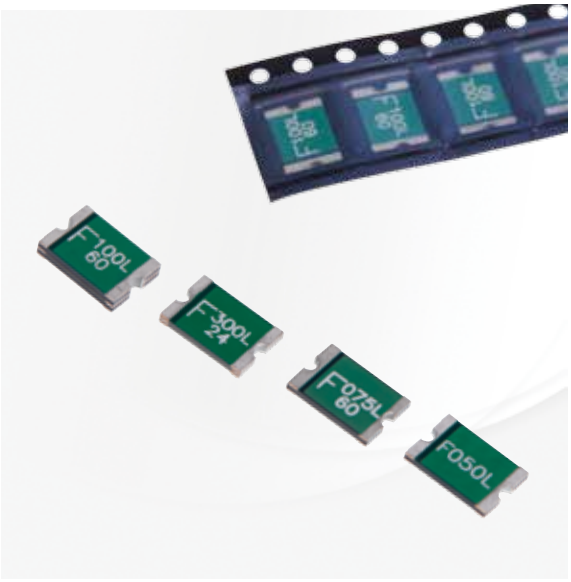
Package Size: 2920 - 0402

Current Rating: Up to 3A

Voltage Rating: 6 - 60V

SMD PPTC Series

FSMD2920 Series



Application
All high-density boards
Product Features
2920 Dimension, Surface mountable, Solid state, Faster time to trip than standard SMD devices.

Operation Current
0.30A~5.00A
Maximum Voltage
6V~60V_{DC}

Temperature Range
-40°C to 85°C

FSMD400-16-2920R~FSMD500-16-2920R	:	1.0K Reel/Tape

Physical specifications

Termination pad materials	Pure Tin
Soldering characteristics	Meets EIA specification RS 186-9E, ANSI/J-std-002 Category 3

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

NOTE : All Specifications subject to change without notice.

FSMD2016 Series

Application
All high-density boards
Product Features
Small surface mount, Solid state, Faster time to trip than standard SMD devices, Lower resistance than standard SMD devices

Operation Current
0.30A~2.00A
Maximum Voltage
6V~60VDC

Temperature Range
-40°C to 85°C
Agency Recognition

AGENCY	AGENCY FILE NUMBER
	UL(E211981)
	C-UL(E211981)
	TÜV (R50090556)

RoHS HF Halogen Free
SVHC Compliant

FSMD260-13R~FSMD300R	:	1.5K Reel/Tape

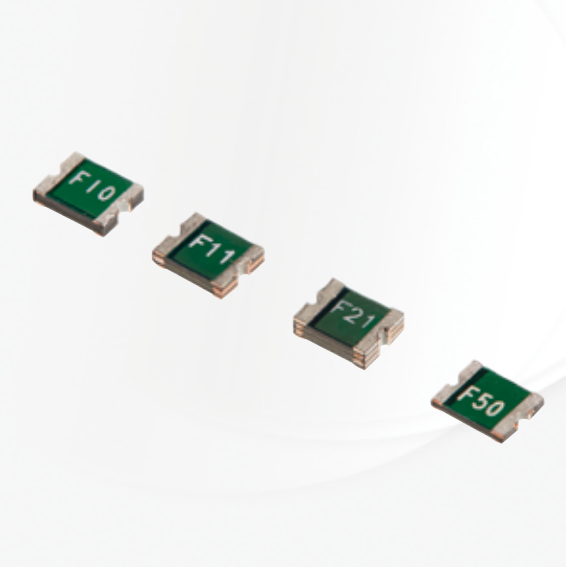
Physical specifications

Termination pad materials	Pure Tin
Soldering characteristics	Meets EIA specification RS 186-9E, ANSI/J-std-002 Category 3

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

FSMD1210 Series



Application
All high-density boards
Product Features
Small surface mount, Solid state Faster time to trip than standard SMD devices Lower resistance than standard SMD devices

Operation Current
0.05A~2.00A
Maximum Voltage
6V~60VDC

Temperature Range
-40°C to 85°C
Agency Recognition

AGENCY	AGENCY FILE NUMBER
	UL(E211981)
	C-UL(E211981)
	TÜV (R50090556)

RoHS HF Halogen Free

Package Information

Part Number		Standard Package
FSMD010-0805-R~FSMD035-0805-R	:	4.0K Reel/Tape
FSMD050-0805R~FSMD110-0805R	:	3.0K Reel/Tape

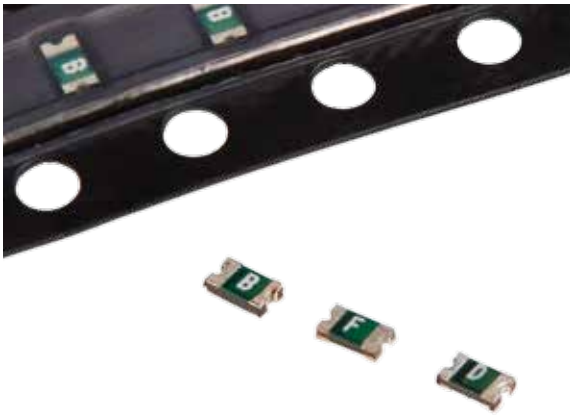
Physical specifications

Termination pad materials	Pure Tin
Soldering characteristics	Meets EIA specification RS 186-9E, ANSI/J-std-002 Category 3

Warning :

- Each product should be carefully evaluated and tested for their suitability of application.
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.

FSMD0603 Series



Application
All high-density boards
Product Features
Small surface mountable, Solid state, Faster time to trip than standard SMD devices, Lower resistance than standard SMD devices

Operation Current
0.01A~0.25A
Maximum Voltage
9V~60V_{DC}

Temperature Range
-40°C to 85°C
Agency Recognition

AGENCY	AGENCY FILE NUMBER
	UL(E211981)
	C-UL(E211981)
	TÜV (R50090556)

- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent, including some inert material such as silicone based oil, lubricant and etc. Prolonged contact will damage the device performance.
- Additional protection mechanism are strongly recommended to be used in conjunction with the PPTC device for protection against abnormal or failure conditions.
- Avoid use of PPTC device in a constrained space such as potting material, housing and containers where have limited space to accommodate device thermal expansion and/or contraction.
- Avoid PPTC devices being exposed to prolonged high temperature and/or high humidity storage environment such as 85°C and/or 85RH% which could diminish PPTC's performance.

NOTE : All Specifications subject to change without notice.

Low Rho FSMD0805 Series

Application
All high-density boards
Product Features
Small surface mountable, Solid state, Faster time to trip than standard SMD devices, Lower resistance than standard SMD devices

Operation Current
0.75A~3.50A
Maximum Voltage
6V_{DC}

Temperature Range
-40°C to 85°C
Agency Recognition

AGENCY	AGENCY FILE NUMBER
	UL(E211981)
	C-UL(E211981)

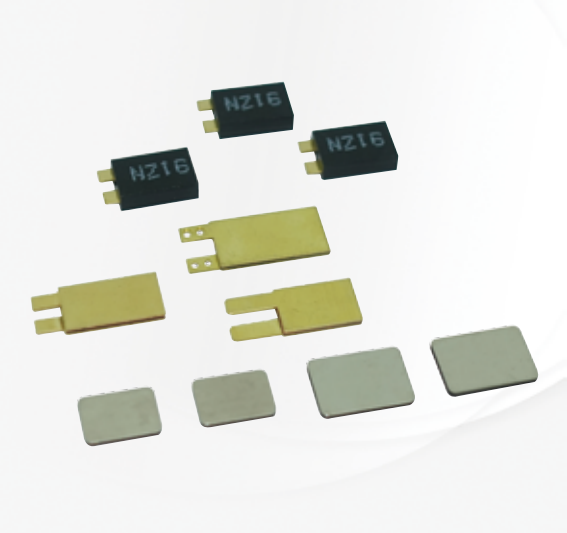
FUZETEC

Fuzetec Disc, Ring & Custom Shaped PPTC Devices Offers Customized Overcurrent Protections to Tailor Fit Engineer Design Specification and Meet Customer Requirements

Customized Products

Automotive Customized Products



Application
Automotive motor applications.
Product Features
Custom shaped PPTC devices to fit into motor structure.
Trip-time & resistance adjustable.
Outstanding shock & vibration resistant
Automotive grade high temperature up to 125°C

Operation Current
Trip Current up to 15A/Maximum current capability up to 50A
Operation Voltage
12V~30V_{DC}; High voltage capability up to 60V_{DC}

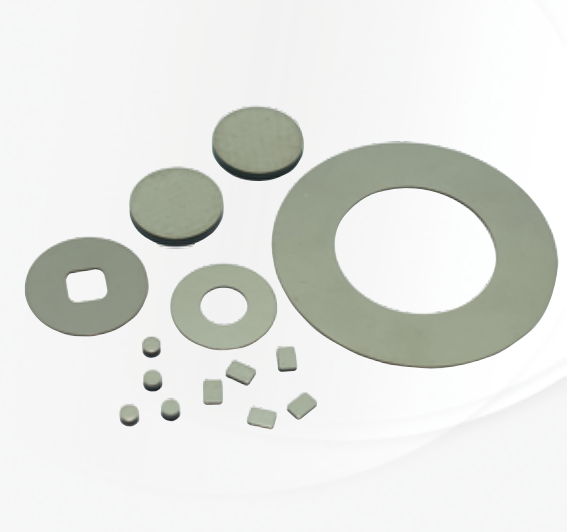
Temperature Range
-40°C ~ 85°C/125°C

Terminal PPTC
FCTS XXXXX
Special terminal PPTC devices are designed for automotive motor applications, protect potential motor stalling overcurrent condition casued by abnormal operation; custom shape and configuration offer better design flexibility.

Terminal PPTC w/ Housing
FCTS XXXXX-S
Terminal PPTC devices with exterior housing, provide more reliable performance under high temperature enviroment.

Chip PPTC
Small-sized custom shaped PPTC for small electric motor application.

Battery/Energy Customized



Application
Battery and Energy Applications
Product Features
Hight Current / High Voltage capability for the emerging market demand for high power battery and energy solution for connected equipments.

Operation Current
Battery Series
2.00A~8A; high current capability up to 33A for special battery applications
Energy Series
0.16A~2.00A for high voltage AC/DC application

Operation Voltage
Battery Series
3V~16V_{DC}; High voltage capability up to 60V_{DC}
Energy Series
Rated Voltage 240$V_{AC/DC}$, Max.Int. Voltage 265$V_{AC/DC}$

Temperature Range
-40°C ~ 85°C/125°C

Battery Disc/Ring PPTC
FDC XXXXX
Custom designed disc and ring shaped PPTC devices for consumer, vehicle, ship and military battery applications, high current and voltage rating products available.

Energy Chip PPTC Series
FCT XXXXX
Base on Fuzetec high voltage PPTC formulation, special design for energy applications with surge immunity requirements, for more information about Energy Chip PPTC series, please contact with Fuzetec.

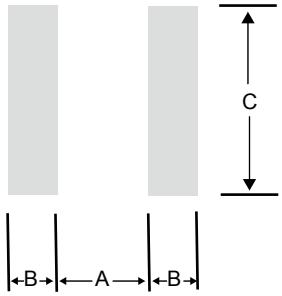
Pad Layouts 、Solder Reflow Recommendations

The dimensions in the table below provide the recommended pad layout for Surface Mount Device in different footprints.



Pad dimensions (Millimeter)			
Device	A Nominal	B Nominal	C Nominal
All 2920 Series	5.10	2.30	5.60
All 2016 Series	3.40	1.50	4.60
All 1812 Series	3.45	1.78	3.50
All 1210 Series	2.00	1.00	2.80
All 1206 Series	2.00	1.00	1.90
All 0805 Series	1.20	1.00	1.50
All 0603 Series	0.80	0.60	0.80
All 0402 Series	0.40	0.60	0.70

Profile Feature	Pb-Free Assembly
Average Ramp-Up Rate (Tsmax to Tp)	3°C/second max.
Preheat : Temperature Min (Tsmin) Temperature Max (Tsmax) Time (tsmin to tsmax)	 150°C 200°C 60-180 seconds
Time maintained above : Temperature(T_L) Time (t_L)	 217°C 60-150 seconds
Peak/Classification Temperature(Tp) :	260°C
Time within 5°C of actual Peak : Temperature (tp)	 20-40 seconds
Ramp-Down Rate :	6°C/second max.
Time 25°C to Peak Temperature :	8 minutes max.

Note 1 : All temperatures refer to the package, measured on the package body surface.

Solder reflow

※ Due to " Lead Free " nature, Temperature and Dwelling Time for the soldering zone is higher than those for Regular. This may cause damage to other components.

1. Recommended max paste thickness is 0.25mm.(Nominal)
2. Devices can be cleaned using standard methods and aqueous solvent.
3. Rework use standard industry practices.
4. Storage Environment : < 30°C / 60% RH

Caution :

1. If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
2. Devices are not designed to be wave soldered to the bottom side of the board
