About Us

Focusens are Chinese Sensor Expert that have more than 15 years field experience. We are committed to provide high quality thermal Components NTC thermistors , PTC thermistors , NTC sensors, PT100 PT1000 RTD sensors ,thermocouples, Silicon liner PTC sensors as well as digital sensors .

Our activities covers all over the world. Key players like Bosch, Schneider, Samsung as well as Chinese manufacturers like Galanz, Medtronic , Mindray ,BYD etc. are among our clients list.

Flexible custom design and prompt delivery are our always advantages.

Meanwhile we accept OEM on customers´ design.

Contact us now for details and improve projects efficiency with our expertise!

Temp. Humidity Transmitter / Thermal Fuse / Thermal Protector / Level Sensor etc.

MFE-1 series temperature sensor is plastic overmoulding sensor. TPE, PVC material as standard material, with different mounting request it can be injected into different size and type.

NTC, RTD elements are most popular sensing element.

Special advantage of MFE-1 series is high water proof, with IP67 as standard class, it can reach IP68 on request.

Another advantage is custom flexible, size, mounting type, sensing type and material type can be customized according to application condition.

Typical Applications

- Refrigerator
- Water heater
- Washing Machine and Tumble Dryer
- Ambient temperature measurement

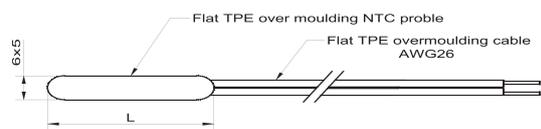

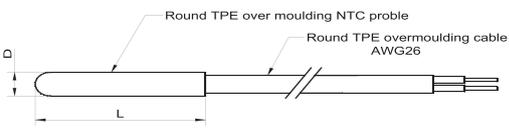

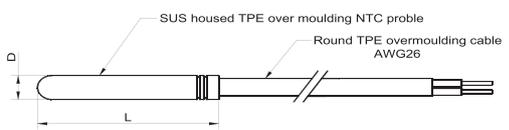

Features

- Excellent insulating property and waterproof
- High mechanical strength
- High reliability and long term stability

Technical Data

Item	Parameter
● Water and Dust proof	● IP67
● Sensing element	● NTC Thermistor
● Temperature range	● -30 - +105°C
● Response time	● water (0.4 m/s) T0.63=30s
● Dissipation Factor	● 2.5mW/°C
● Long-term stability	● Drift 3% after 1000h heat or cold store (80°C / -30°C)
● Dielectric strength	● 1500VAC
● Insulation resistance	● 100MΩ@500VDC

Dimensions (mm)

Part No.	Dimensions
MFE-1A	
MFE-1B	
MFE-1C	

Different type of connector available, please contact our sales staff.

MFE-2 series temperature sensor is epoxy encapsulation type sensor.
 NTC, RTD elements are most popular sensing element.
 Special advantage of MFE-2 series is cost saving and compact size.

Another advantage is custom flexible, size, mounting type, sensing type and material type can be customized according to application condition.

Typical Applications

- HVAC
- Ambient temperature measurement
- Glasshouse

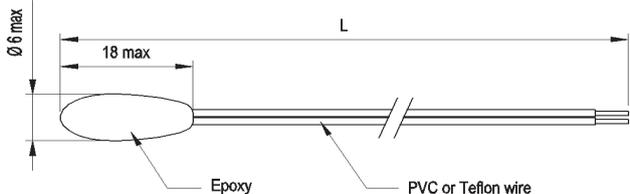

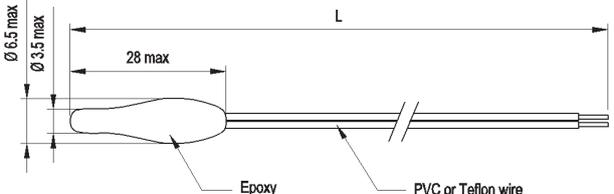

Features

- High mechanical strength
- High reliability and long term stability

Technical Data

Item	Parameter
● water and Dust proof	● IP66
● Sensing element	● NTC Thermistor
● Temperature range	● -30 - +105°C
● Response time	● water (0.4 m/s) T0.63=30s
● Dissipation Factor	● 2.5mW/°C
● Long-term stability	● Drift 3% after 1000h heat or cold store (80°C / -30°C)
● Dielectric strength	● 1500VAC
● Insulation resistance	● 100MΩ@500VDC

Dimensions (mm)

Part No.	Dimensions
MFE-2A	
MFE-2B	

Note: Length require for customer define.

MFT series temperature sensor using NTC thermistor as temperature sensing element. Products can be custom according to different temperature environment or application.

With our mature craft, it can be made with a variety of specifications, customers can use directly without fabricating.

Typical Applications

- Ice maker machine
- Refrigerator
- Heat Pump
- Water heater
- Floor heating System
- General Application etc.

Features

- SUS , Cu, Plastic housings for food grade
- Suitable for general temperature work in

Technical Data

Item	Parameter
● Sensing Element	● NTC Thermistor various R and B value on request
● Temperature range	● -40°C to +105°C
● Response time	● Water (0.4m/s) T0.63 ≤ 30s
● Dissipation Factor	● ≥ 2.5mW/°C
● Long-term stability	● Drift ≤ 3% after 1000h heat or cold store (80°C / -30°C)
● Dielectric Strength	● 1500VAC
● Insulation Resistance	● ≥100MΩ 500VDC

Dimensions (mm)

Other options:

Standard value: R25°C: 10K B25/85°C: 3435, different NTC R-T curve

Different probe and wire size and color available.

Different size SUS housings available for sensor mounting protection

Different type of connector is available

MFL series temperature sensor using the NTC resistance element, according to the different temperature environment or application, through the mature technology, fabricate into a variety of specifications of the sensor, customers can use directly without fabricating.

Typical Applications

- Coffee Machine

Features

- Easy installation
- Fast response
- High level of water proof and durability

Technical Data

Item	Parameter
● Sensing Element	● NTC Thermistor various R and B value on request
● Temperature range	● -20°C to +110°C
● Response time	● Water (0.4m/s) T0.63 ≤ 30s
● Dissipation Factor	● ≤100 mW/°C
● Long-term stability	● Drift ≤ 3% after 1000h heat or cold store (80°C / -30°C)
● Dielectric Strength	● 1500VAC
● Insulation Resistance	● ≥100MΩ 500VDC

MFL-A

Feature

- Fast response
- Easy installation

Application

- Coffee machine

MFP-1 series temperature sensor using the NTC thermistor element, according to the different temperature environment or application, through the mature technology, fabricate into a variety of specifications of the sensor, customers can use directly without fabricating. MFP-1 Series Sensor is simply connected to silicon rubber or other high temperature lead wire. NTC protect by silicon rubber tube or Teflon tube.

Typical Applications

- Rice Cooker
- Induction cooker
- Ambient temp etc.

Features

- Simply connected to high temperature lead wire
- Protected by silicon rubber tube or Teflon tube.
-

Technical Data

Item	Parameter
● Sensing Element	● NTC Thermistor various R and B value on request
● Temperature range	● -20°C to +200°C
● Response time	● $T_{0.63} \leq 60s$ in air
● Dissipation Factor	● $\geq 2.5mW/^\circ C$
● Long-term stability	● Drift $\leq 3\%$ after 1000h heat or cold store (80°C / -30°C)
● Dielectric Strength	● 1000VAC
● Insulation Resistance	● $\geq 100M\Omega$ 500VDC

MFP-2 series temperature sensor using the NTC thermistor element. It is surface mounting type sensor fixed to devices with mounting screw of different required size .

Products can be custom according to different temperature environment or application.

With our mature craft, it can be made with a variety of specifications, customers can use directly without fabricating.

Typical Applications

- Refrigerator
- HVAC
- Projector
- Motor
- Lithium Battery Protect
- Heat sink

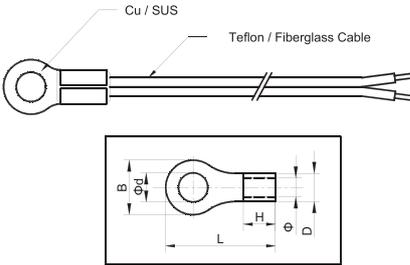

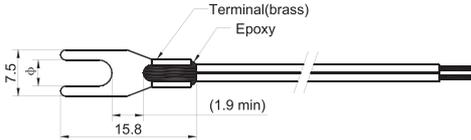

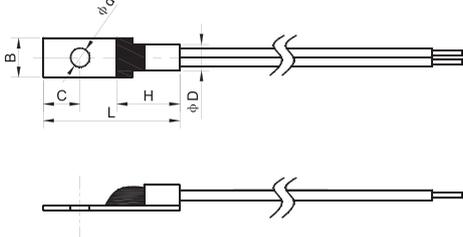

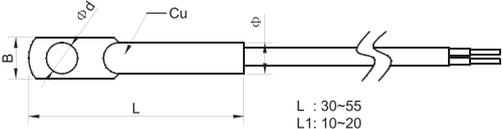

Features

- Standard Lug terminal sensor with NTC element
- Easy installation.

MFP-3 series temperature sensor using the NTC thermistor element. It is immersing type sensor probing sensor into liquid or air chamber which temperature to be measured.

Products can be custom according to different temperature environment or application.

With our mature craft, it can be made with a variety of specifications, customers can use directly without fabricating.

Typical Applications

- Toilet seat heating
- Water heater
- Floor heating and
- Cogeneration systems

Features

- Moisture-proof
- Fast response
- Small time constant

Technical Data

Item	Parameter

MFP-4 series temperature sensor using the NTC thermistor element. It is flange mounting type sensor probing sensor into liquid or air chamber which temperature to be measured.

Products can be custom according to different temperature environment or application.

With our mature craft, it can be made with a variety of specifications, customers can use directly without fabricating.

Typical Applications

- Toaster oven
- Constant temperature liquid bath
- Constant temperature chambers
- Food waste disposer
- Dish washer.

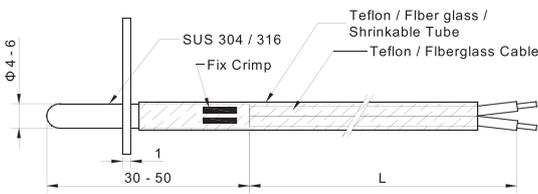

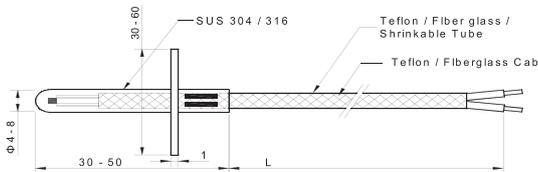

Features

- Easy installation
- Fast response
- High level of water proof and durability

Technical Data

Item	Parameter
● Sensing Element	● NTC Thermistor various R and B value on request
● Temperature range	● -20°C to +250°C
● Response time	● Water (0.4m/s) T0.63 ≤ 12s
● Dissipation Factor	● ≥ 2.5mW/°C
● Long-term stability	● Drift ≤ 3% after 1000h heat or cold store (80°C / -30°C)
● Dielectric Strength	● 1500VAC
● Insulation Resistance	● ≥100MΩ 500VDC

Other option:

Different probe and wire size and color available.

Different size SUS housings available for sensor mounting protection

Different type of connector available

MFP-5 series temperature sensor using the NTC thermistor element.
It is screw type sensor mount onto devices by screwing housing.

Products can be custom according to different temperature environment or application.

With our mature craft, it can be made with a variety of specifications, customers can use directly without fabricating.

Typical Applications

- Water heater
- Coffee machine
- Water boiler
- Solar systems

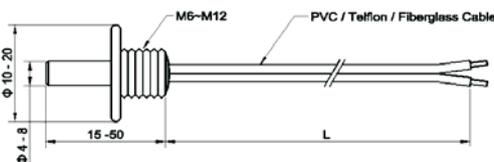

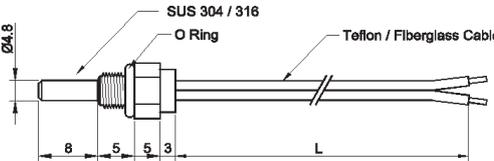

Features

- Screw and nut mounting
- Solid structure
- Waterproof and fast response

Technical Data

Item	Parameter
● Sensing Element	● NTC Thermistor various R and B value on request
● Temperature range	● -30°C to +125°C
● Response time	● Water (0.4m/s) T0.63 ≤ 30s
● Dissipation Factor	● ≥ 2.5mW/°C
● Long-term stability	● Drift ≤ 3% after 1000h heat or cold store (80°C / -30°C)

- Different type of connector available

MFP-6 series temperature sensor using the thin film type NTC resistance element, according to the different temperature environment or application, through the mature technology, fabricate into a variety of specifications of the sensor, customers can use directly without fabricating.

Typical Applications

- Duplicator
- Battery pack
- Electronic calendar
- Thermometer
- Temperature measuring etc.

Features

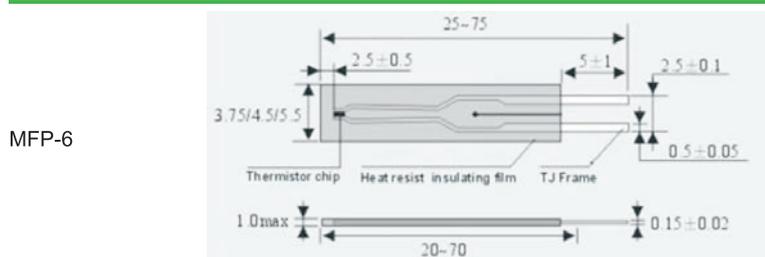

- Thin film NTC sensing element.
- Miniature designed.
- High precision
- Quick response
- Good stability

Technical Data

Item	Parameter
● Sensing Element	● Thin NTC Thermistor various R and B value on request
● Temperature range	● -30°C to +120°C
● Response time	● T0.63 ≤ 60s in air
● Dissipation Factor	● Approx 0.9 mW/°C
● Long-term stability	● Drift ≤ 3% after 1000h heat or cold store (80°C / -30°C)
● Dielectric Strength	● 700VAC
● Insulation Resistance	● ≥100MΩ 500VDC

Dimensions (mm)

Part No.	Dimensions	Application
----------	------------	-------------

- Thin film, miniature designed
- Fast respond
- Quick response and good stability

Application

- Duplicator
- Battery pack etc.

MFP-7 series temperature sensor using the NTC resistance element, according to the different temperature environment or application, through the mature technology, fabricate into a variety of specifications of the sensor, customers can use directly without fabricating.

Typical Applications

- Pipe heating
- Floor heating
- Cogeneration systems

Features

- Fast response
- High temperature measuring precision
- Small volume, convenient installation
- Heat resistant plastic shell
- High reliability and long term stability

Technical Data

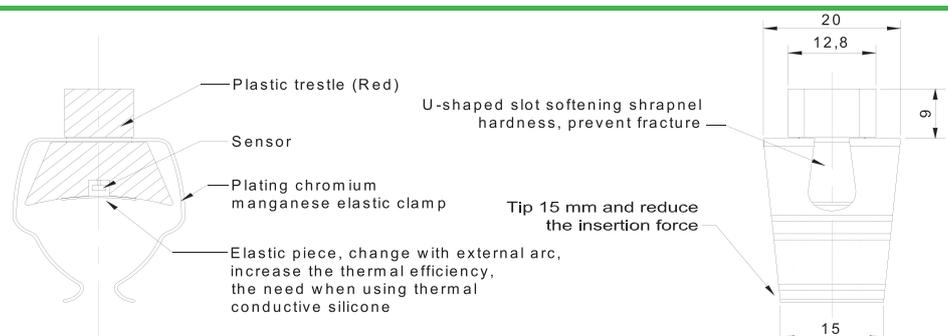

Item	Parameter
● Sensing Element	● NTC Thermistor various R and B value on request
● Temperature range	● -40°C to +105°C

Ordering code

Below ordering code applicable for NTC thermistor sensor MFE-1 , MFE-2 , MFT , MFP-1 , MFP-2 , MFP-3 , MFP-4 , MFP-6 , MFP-7

MFX x xxx x xxx x x x x
 (1) (2) (3) (4) (5) (6) (7) (8) (9)

1. Housings Type.

Code	Description
MFE	Epoxy encapsulation type/ injection molding type
MFT	Tubular type
MFL	Insert lead type
MFP-1	Line pressing type
MFP-2	Surface installation type
MFP-3	Multi-step type
MFP-4	Flange shape type
MFP-5	Threaded fastening installation
MFP-6	Thin film NTC assembly
MFP-7	Pipe clamp type

2. Sub-class: Housings shape.

3. Resistance value at 25°C.

4. Resistance tolerance.

Code	Tolerance (25°C)%	Code	Tolerance (25°C)%
E	±0.5	H	±3.0
F	±1.0	J	±5.0
G	±2.0	K	±10.0

5. Beta value, unit: K.

6. Beta value Temperature code.

Code	T1/T2
A	25/50(Default)
B	25/85
E	Defined by Customer

7. Wire type.

8. Wire length.

The 1st and 2nd digits are for the significant figures of the length and the 3rd indicate the numbering of the zeros following.

Example: 1m = 102, 10m=103.

9. Housings Drawing number.

The temperature sensor is a kind of silicon temperature sensor, it have a positive temperature coefficient of resistance (PTC) and suitable for use in measurement and control systems.

Tolerances of 0.5% or other special selections are available on request.

Typical Applications

- Temperature measurement
- Control system
-
-

Features

- High accuracy and reliability
- Long term stability
- Positive temperature coefficient
- Virtually linear characteristic

Technical Data

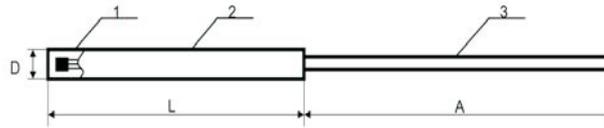

Item	Parameter
● Sensing Element	● silicon sensor element
● Max working temperatures range	● -40°C to +150°C
● Max.Contanstant current @25°C	● 10mA
● Rated working current @25°C	● 5mA
● Rated Power: PDIS	● 50mW
● Thermal Time Constant	● Within 60s in still liquid

KTY83-110 / 120/121/122/150/151 packed in DO3

Example: 1m = 102, 10m=103.

Thermocouples are a widely used type of temperature sensor for measurement and control and can also be used to convert a temperature gradient into electricity.

A thermocouple consists of two conductors of different materials (usually metal alloys) that produce a voltage in the vicinity of the point where the two conductors are in contact.

T thermocouple show the perfect properties at low temperature, suitable for -200 ~ 350°C temperature measurement

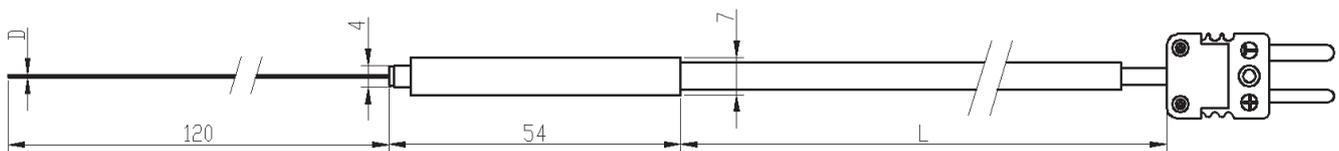

Applications

- Disinfection cabinet
- Cold storage
- Industrial equipment

Features

- With quick response, reducing dynamic error
- Optional installation methods
- Wide measuring range
- High mechanical strength, good pressure-resistant performance

1. Focusens Thermocouple temperature sensor

2. Thermocouple class

Class	Thermocouple Material
K	NiCr – NiSi
N	NiCrSi – NiSi
E	NiCr – CuNi
J	Fe – CuNi
T	Cu – CuNi
S	PtRh10-Pt

3. Thermocouple filament number

Code	Description
1	Simplex sensing element
2	Duplex sensing element

4. Thermocouple Conductive with housing

Code	Description
I	Insulated with housing
C	Conductive with housing

5. Mounting and Fixing

Code	Description
1	Without fixing device
2	Threaded connector
3	Movable flange
4	Fixed flange
5	Elbow tube connector
6	Threaded cone connection
7	Straight tube connection
8	Fixed threaded tube connection
9	Movable threaded tube connection

6. Junction Box

Code	Description
1	Anti-spray type
2	Water-proof type

The LM35 series are precision integrated-circuit temperature sensors, whose output voltage is linearly proportional to the Celsius (Centigrade) temperature. The LM35 thus has an advantage over linear temperature sensors calibrated in ° Kelvin, as the user is not required to subtract a large constant voltage from its output to obtain convenient Centigrade scaling.

Typical Applications	Features
Heater systems Measuring instruments Washing machines Over-heating protection	<ul style="list-style-type: none"> Measures temperatures from -55°C to $+100^{\circ}\text{C}$ (-67°F to $+212^{\circ}\text{F}$) Thermometer resolution is user-selectable from 9 to 12 bits

Technical Data

Parameter	Temperature
● Power Supply	● 0 - 30V
● Sensor	● DS18B20
● Measurement Range	● -40°C - $+150^{\circ}\text{C}$
● Accuracy	● $\pm 0.5^{\circ}\text{C}$ accuracy from -10°C to $+85^{\circ}\text{C}$
	● $\pm 2^{\circ}\text{C}$ accuracy from -55°C to $+125^{\circ}\text{C}$
● Work Current	● 1.5mA
● Standby Current	● 1uA
● Output Pin Sink Current	● 4mA (@ V _{I/O} =0.4V)
● Response	● Converts temperature to 12-bit digital word in 750 ms (max.)
● Output	● Open-drain 1-Wire interface pin.
● Drift	● $\pm 0.2^{\circ}\text{C}$ on a 1000h stress test at $+125^{\circ}\text{C}$ with VDD= 5.5V

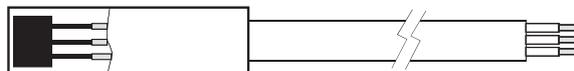

Note :

1. House material, size and configuration adjustable according to mounting requirement.
2. Cable insulation, gauge and length adaptable with requirement.
3. Other accessories available on request.
4. If only monitor the environment temperature, may be used MAX31820, but power supply from 3.0V to 3.7V, and $\pm 0.5^{\circ}\text{C}$ Accuracy from $+10^{\circ}\text{C}$ to $+45^{\circ}\text{C}$

The DS18B20 digital thermometer provides 9-bit to 12-bit Celsius temperature measurements and has an alarm function with nonvolatile user-programmable upper and lower trigger points. The DS18B20 communicates over a 1-Wire bus that by definition requires only one data line (and ground) for communication with a central microprocessor. It has an operating temperature range of -55°C to +125°C and is accurate to $\pm 0.5^\circ\text{C}$ over the range of -10°C to +85°C.

Typical Applications	Features
<ul style="list-style-type: none"> • Heater systems • Measuring instruments • Washing machines • Over-heating protection 	<ul style="list-style-type: none"> • Measures temperatures from -55°C to $+100^\circ\text{C}$ (-67°F to $+212^\circ\text{F}$) • Thermometer resolution is user-selectable from 9 to 12 bits

The AD590 is a 2-terminal integrated circuit temperature transducer that produces an output current proportional to absolute temperature. For supply voltages between 4 V and 30 V, the device acts as a high impedance, constant current regulator passing 1 $\mu\text{A}/\text{K}$. Laser trimming of the chip's thin-film resistors is used to calibrate the device to 298.2 μA output at 298.2 K (25°C).

Typical Applications

- -Refrigerator,
- -Air conditioner,
- -Granary,
- -Ice house,
- -Industrial equipment

Features

- Wide power supply range: 4 V to 30 V
- Linear current output: 1 $\mu\text{A}/\text{K}$
- Wide temperature range: -55°C to $+150^{\circ}\text{C}$
- 2-terminal device: voltage in/current out
- Excellent linearity: $\pm 0.3^{\circ}\text{C}$ over full range (AD590M)

The FHR400 series high precision NTC temperature sensor are specifically used for medical application monitoring body temperature condition.

Compatible with all accept YSI 400 series sensor monitoring equipment. Such as GE, HP, Japan photoelectric, philips, Siemens, mindray, treasure Wright monitor, etc.

Typical Applications

- Accurate temperature sensing and monitoring compatible of YSI400 Series
- Human or animal baby Incubator

Features

- Miniature Size and Fast Response
- $\pm 0.2^{\circ}\text{C}$ from 25° to 45°C @ 400 series
- Accurate temperature measurement in 3 minutes
- Excellent stability and reliability
- Custom mounting and material configuration
- Moisture proof
-

400 Series Reusable medical temperature probe

FHR 4211

Body surface / Skin probe

Application	Oral/rectal temperature probe
probe size	adult diameter 12 mm, children diameter 5 mm
compatibility	Compatible with all YSI 402 series sensor adaptable monitoring equipment
Feature	Accurate temperature measurement in 5 minutes
Connector	6.3 mono audio plug
Resistance	2.252kohm
Encapsulation case diameter available with 4 sizes : 12 mm, 10 mm, 7 mm, 5 mm	

FHR 4213

Body surface / Skin probe

Application	Oral/rectal temperature probe
probe size	adult diameter 12 mm, children diameter 5 mm
compatibility	Compatible with all accept YSI 404 series sensor monitoring equipment
Feature	Accurate temperature measurement in 3 minutes
Connector	3.5 double track plug
Resistance	10kohm
Encapsulation case diameter available with 4 sizes : 12 mm, 10 mm, 7 mm, 5 mm	

FHR 4216

Body surface / Skin probe

Application	Oral/rectal temperature probe
probe size	adult diameter 12 mm, children diameter 5 mm
compatibility	Compatible with all accept YSI 404 series sensor monitoring equipment
Feature	Accurate temperature measurement in 3 minutes
Connector	
Resistance	10kohm
Encapsulation case diameter available with 4 sizes : 12 mm, 10 mm, 7 mm, 5 mm	

FHR 4511

In-body probe

Application	Oral/rectal temperature probe
probe size	adult diameter 4.0 mm, children diameter 3.3 mm
compatibility	Compatible with all YSI 401 series sensor adaptable monitoring equipment
Feature	Accurate temperature measurement in 3 minutes
Connector	6.3 mono audio plug
Resistance	2.252kohm

FHR 4513

In-body probe

Application	Oral/rectal temperature probe
probe size	adult diameter 4.0 mm, children diameter 3.3 mm
compatibility	Compatible with all accept YSI 404 series sensor monitoring equipment
Feature	Accurate temperature measurement in 3 minutes
Connector	3.5 double track plug
Resistance	10kohm

* All product line length according to customer requirements

FHD400 Series Disposable temperature sensor

FHD4515

Disposable In-body probe

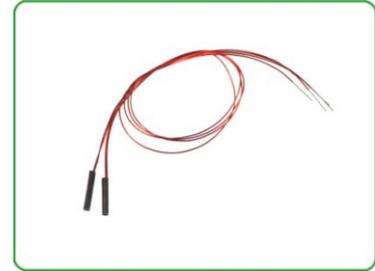

FHD4516

MF5A Series bead temperature thermistor is made of new materials, new technology of production of small type epoxy resin coating of NTC thermistor, has the advantages of high precision and fast response. It is subdivided into various sub-series according to the difference in lead wire configuration.

Typical Applications

- Air conditioning equipment
- Heating equipment
- Medical equipment
- Temperature control instruments
- Electronic gifts
- Electronic temperature and humidity meter
- Auto temperature measurement
- Electronic calendar
- Rechargeable batteries and charger

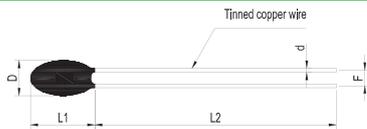

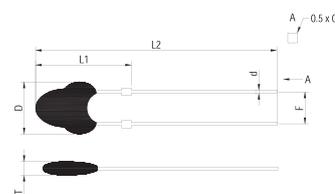

Features

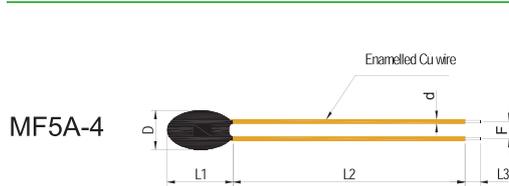

- Tin plating steel wire radial type epoxy resin encapsulation
- Wide range of resistance
- High precision
- Small size and fast response
- High stability

MF57 Series thermistor used for automotive electronics (diesel locomotive, large motor, oil-immersed transformer) of the cooling system for fixed point temperature sensing element, temperature measurement can also be applied to other places.

Typical Applications

- Temperature sensing and measuring in automobile cooling system
- Larger power electric engine
- Combustion engine
- Oil transformer etc.
- Also applicable for temperature measuring on other occasions.

Features

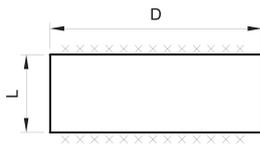

- High reliability and long life
- High sensibility, easy to be replaced
- Wide temperature range
- For Automobile use

MF58 series high precision NTC thermistor is chip in glass thermistor in small size which is made from new material and by new technique. With the advantage of high precision, fast response, reliable stability, it can be used in air-conditioner, heating apparatus, electric thermometer, liquid level sense, automobile electricity, electrical calendar etc.

Typical Applications

- Air conditioning equipment
- Heating equipment
- Electronic thermometer
- Electronic calendar
- Cell phone batteries
- Office automation facilities

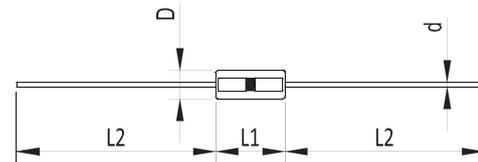

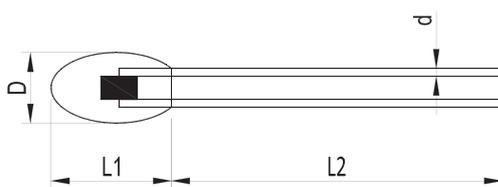

Features

- Small size
- Fast response
- Good interchangeability and consistency
- Radial lead, Axial lead

LPTC81-251	R25=2000	-5%		
LPTC81-252	R25=2000	+5%		
LPTC84-130	R100=1000	$\pm 3\%$	-40 $^{\circ}\text{C}$ ~ +180 $^{\circ}\text{C}$	KTY84 series
LPTC84-150	R100=1000	$\pm 5\%$		
LPTC84-151	R100=1000	-5%		
LPTC84-152	R100=1000	+5%		
LPTC-200	R25=200	$\pm 3\%$; +5%、-5%	-40 $^{\circ}\text{C}$ ~ +160 $^{\circ}\text{C}$	
LPTC-500	R25=500	$\pm 3\%$; +5%、-5%		
LPTC-1200	R25=1200	$\pm 3\%$; +5%、-5%	-50 $^{\circ}\text{C}$ ~ +125 $^{\circ}\text{C}$	
LPTC-1600	R25=1600	$\pm 3\%$; +5%、-5%		
LPTC-3000	R25=3000	$\pm 3\%$		
LPTC-4000	R25=4050	$\pm 3\%$		

Note: Table ahead included standard PN. More parameters and packing type please contact Focusens sales for details

Silicon PTC Thermistor

Our LPTC series silicon PTC thermistor is packed in DO35 glass. The high temperature glass sealing process enable it high reliable and high temperature resist. Tolerance can be $\pm 1\%$ 、 $+2\%$ 、 -2% 、 $+3\%$ 、 -3% 、 $+5\%$ 、 -5% .

Shape and Size (mm)

Model	Pack	D_{MAX}	$L1_{MAX}$	$L2_{MAX}$	$d \pm 0.05$
LPTC	DO35	1.85	3.85	28	0.5

Typical Application

- Temperature measuring and control for auto
- Household apparatus
- For micro motor
- Temperature measuring and control for medical

Characteristics

- DO35 axial lead thermistor
- Positive Temperature coefficient
- High reliable and stability
- Working temperature range: $-40-250^{\circ}\text{C}$

Electrical Parameters

Temperature Range	Dissipation Factor (mW/ $^{\circ}\text{C}$)		Time Constant (s)		P_{MAX} (mW)	I_{MAX} (mA)
	In still air	In still air	In stilling water	In stilling water		
$-40-250^{\circ}\text{C}$	2.5~5	8~10	1.1~1.2	1.1~1.2	≤ 100	1.0

NTC thermistor is Negative Temperature Coefficient of Thermistor resistor, whose primary function is to exhibit a change in electrical resistance with a change in body temperature. Its resistance decrease with the increase of temperature.

Chip NTC thermistor has smaller size and faster response time, suitable for all kinds of miniaturization of products.

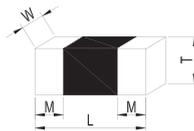

Typical Applications

- Rechargeable batteries and CPU.
- LCD, Crystal oscillator
- Temperature compensation
- Temperature sensing for various types of circuits.

Features

- Small size and fast response
- Corresponding to high B Value

Dimensions (mm)

Size	L(length)	W(width)	T(thickness)	M(width of termination point)
0603 (1608)	.063±.006 (1.6±0.15)	.031±.006 (0.8±0.15)	.037max (0.95max)	.004min (0.10min)
0805 (2012)	.08±.008 (2.0±0.20)	.05±.008 (1.25±0.2)	.05max (1.25max)	.006min (0.15min)
1206 (3216)	.126±.008 (3.2±0.20)	.063±.008 (1.6±0.20)	.063max (1.60max)	.008min (0.20min)

Ordering code

STN 10 xxx x xxxx x N I
 (1) (2) (3) (4) (5) (6) (7) (8)

(1) Product Code: Chip NTC Thermistor

(2) Size

Code	Size (Inches)
10	0603
21	0805
31	1206

(3) Rated zero-power resistance (R25)

The first two are significant figure of resistance and the third one expresses number of following zeros.

Tolerance of R25 (%)

Code	Tolerance of R ₂₅
E	±0.5
F	±1.0
G	±2.0
H	±3.0
J	±5.0
K	±10.0

X Special tolerance

(4) B value constant Unit: K

(5) Tolerance of B value (%)

Code	Tolerance of B value
E	±0.5
F	±1.0
G	±2.0
H	±3.0
J	±5.0
X	Special tolerance

(6) Termination Code:

N—Nickel Barrier

(7) Packaging:

T—Tape & Reel,

B—Bulk

Products Application Overview

智能楼宇
Thermistors for Smart Building

汽车热敏电阻元件
Thermistors for Auto.

智能家居电器
Temp.Sensors for White Goods

新能源汽车温感器
NTC Sensors for EV car & Power Supply

智能厨房电器
Temp.Sensors for Kitchen

燃油汽车温感器
Temp.Sensors for Auto.

OA设备
Thermistor for OA

重复使用医疗温感探头
Reusable Medical Sensor

消费电子
Thermistor for Consuming Devices

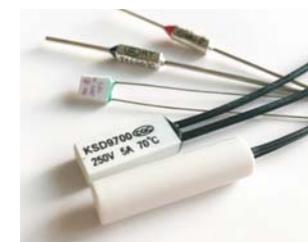

一次性医用温感探头
Disposable Medical Sensor

仪器仪表
Temp.Sensor for meters

温度保险丝及温控开关
Thermal Fuse & Temp.Protector
